INVESTIGATIVE OPHTHALMOLOGY

Editors

Editor

BERNARD BECKER
Professor of Ophthalmology
Washington University School of Medicine
St. Louis, Missouri

Editorial Board

JAMES H. ALLEN
Professor of Ophthalmology
Tulane University School of Medicine
New Orleans, Louisiana

ELMER J. BALLINTINE
Assistant Clinical Professor of Ophthalmology
Western Reserve University School of Medicine
Cleveland, Ohio

GOODWIN M. BREININ
Professor of Ophthalmology
New York University School of Medicine
New York, New York

JOHN E. HARRIS
Professor of Ophthalmology
University of Minnesota
Minneapolis, Minnesota

MICHAEL J. HOGAN
Professor of Ophthalmology
University of California Medical School
San Francisco, California

JIN H. KINOSHITA
Assistant Professor of Biological Chemistry
Harvard Medical School
Boston, Massachusetts

V. EVERETT KINSEY
Assistant Director of Research, Kresge Eye Institute
Professor of Ophthalmic Chemistry, Wayne State University
Detroit, Michigan

PETER C. KRONFELD
Professor of Ophthalmology
University of Illinois College of Medicine
Chicago, Illinois

IRVING H. LEOPOLD
Director
Department of Ophthalmology, Mount Sinai Hospital
New York, New York

A. EDWARD MAUMENEE
Professor of Ophthalmology
Johns Hopkins University School of Medicine
Baltimore, Maryland

KENNETH N. OGLE
Professor of Physiologic Optics
Mayo Foundation, University of Minnesota
Rochester, Minnesota

ALBERT M. POTTS
Professor of Ophthalmology
University of Chicago School of Medicine
Chicago, Illinois

LUDWIG VON SALLMANN
Chief, Ophthalmology Branch
National Institute of Neurological Diseases and Blindness
Bethesda, Maryland

GEORGE K. SMELSER
Professor of Anatomy
Columbia University College of Physicians & Surgeons
New York, New York

KENNETH C. SWAN
Professor of Ophthalmology
University of Oregon School of Medicine
Portland, Oregon

LORENZ E. ZIMMERMAN
Chief, Ophthalmic Pathology Branch
Armed Forces Institute of Pathology
Washington 25, D. C.

Subject index*

A

Abstracts of papers presented at sectional meetings of Association for Research in Ophthalmology, 109, 526, 640

Adenosine triphosphatase activity, electron microscopic localization in rabbit cornea in relation to transport (Kaye and Tice), 22

Adrenergic drugs, mechanism of action in glaucoma (Sears), 115

nerves to eye and to related structures in man and cynomolgus monkey (Ehinger), 42

Afferent fibers from oculomotor nerves, trigeminal pathway for (Joffe, Gay, and Antrim), 222

Age, effect on cell division, ^{3}H-thymidine incorporation, and diurnal rhythm in lens epithelium of rats (von Sallmann and Grimes), 560

Albuminoid, conversion of soluble lens protein to (Fulhorst and Young), 298

Alloxan and pancreatectomy, comparison of amino acid transport in ocular structures of rabbits made diabetic by (Reddy, Kinsey, and Nathorst-Windahl), 166

Alloxan—Cont'd

vascularized rabbit eyes, corneal lymphatics in (Collin), 1

Amino acid transport in ocular structures of rabbits made diabetic by alloxan and pancreatectomy, comparison (Reddy, Kinsey, and Nathorst-Windahl), 166

Announcements, 114, 232, 335, 426, 526, 644

Anticholinesterase agents locally applied, systemic effects (Ellis), 146

and cholinergic agents, comparison of action in glaucoma (Drance), 130

Aqueous humor, dynamics, effects of pilocarpine on, in cynomolgus monkeys (Bill and Wålinder), 170

outflow, site of resistance to, in eyes of Ethiopian green monkeys, pressure in canal of Schlemm and its relation to (Sears), 610

of rabbits made diabetic by alloxan and pancreatectomy, comparison of amino acid transport in (Reddy, Kinsey, and Nathorst-Windahl), 166

turnover rates in cat, effect of ouabain and chlorothiazide on (Macri, Dixon, and Rall), 386

of thiourea in (Ballin et al.), 391

and lens, trivalent chromium in (Farkas and Pluščec), 398

outflow opposed by venous pressure in patients with and without chronic open-angle glaucoma (Bettman, McEwen, and McBain), 624

Aqueous-venous shunt, effect on rabbit eyes (Lee and Schepens), 304

and intraocular pressure, report of animal studies (Lee and Schepens), 59

Association for Research in Ophthalmology:

Abstracts of papers presented at sectional meetings, 109, 319

Association—Cont'd

Program for June Annual Meeting, 229

Program for October Annual Meeting, 422

B

Blood supply to optic nerves and chiasm, defective, certain cerebral involvements associated with (Walsh), 433

vessels, small, and retina, beef, mucopolysaccharides in (Freeman and Wortman), 88

Book reviews, 228, 335, 421, 642

Bundle, fiber optic, retinal receptors as, resolution in excised retinal tissue (Enoch and Glismann), 208

C

Canal of Schlemm, endothelium forming inner wall, effect of pilocarpine on, in monkey (Holmberg and Bárány), 53

pressure in, and its relation to site of resistance to outflow of aqueous humor in eyes of Ethiopian green monkeys (Sears), 610

Carbachol, topical, effect on pupil and refraction in young and presbyopic monkeys (Törnqvist), 186

Cardiac oculorespiratory reflex in dog (Joffe and Gay), 550

Cataract agent, suckling mouse, ocular lesions induced in C57 mice by (Olmsted et al.), 413

galactose, development in rats, changes in water, protein, and glutathione contents in lens in course of (Sippel), 568

energy metabolism in lens during (Sippel), 576

Cell division, ^{3}H-thymidine incorporation, and diurnal rhythm, effect of age on, in lens epithelium of rats (von Sallmann and Grimes), 560

*February, pp. 1–114; April pp. 115–232; June pp. 233–336; August pp. 337–426; October pp. 427–534; December pp. 535-656.

Cerebral involvements associated with defective blood supply to optic nerves and chiasm (Walsh), 433

vessels, small, and retina, beef, mucopolysaccharides in (Freeman and Wortman), 88

Cervical ganglionectomy, changes in outflow facility and norepinephrine content in iris and ciliary processes of albino rabbits after (Sears), 312

sympathetic stimulation in monkeys and effects on outflow facility and intraocular volume (Casey), 33

Chiasm and optic nerves, indirect trauma to, pathological-clinical correlations (Walsh), 433

Chlorothiazide, effect on aqueous humor turnover rates in cat (Macri, Dixon, and Rall), 386

Cholinergic and anticholinesterase agents, comparison of action in glaucoma (Drance), 130

Cholinesterase agents, long-acting, use in glaucoma (Klayman), 136

Chromium, trivalent, in aqueous and lens of rats (Farkas and Pluščec), 398

Ciliary body–iris preparations, iodopyracet and iodide accumulation by, influence of pilocarpine on (Wålinder), 378

epithelium of albino rabbits, nucleoside phosphatase activity in (Shiose and Sears), 152

processes and iris of albino rabbits, changes in outflow facility and norepinephrine content after cervical ganglionectomy (Sears et al.), 312

Color defective subjects, densitometry of pigments in rods and cones of (Rushton), 233

Cones, rods and, densitometry of pigments in (Rushton), 233

Connective tissue cells, corneal, development of enzyme activities in, during lag phase of wound repair (Weimar and Haraguchi), 14

heritable disorders of (McKusick) (B. rev.), 421

Cornea, electron microscopic localization of adenosine triphosphatase activity in, in relation to transport (Kaye and Tice), 22

World Congress (King and McTigue), (B. rev.), 335

Corneal connective tissue cells, development of enzyme activities in, during lag phase of wound repair (Weimar and Haraguchi), 14

epithelial cells of dogfish, antagonists of DNA synthesis in (Zigman, Tuttle, and Lerman), 636

endothelium in vitro, characterization by ultrastructure and histochemistry (Lowry), 355

lipids—sterol and fatty acid synthesis in intact calf cornea (Andrews), 367

lymphatics in alloxan vascularized rabbit eyes (Collin), 1

stroma cell, cytoplasmic granules of (Kitano), 277

Corneoretinal potential, oscillations of, and infrared radiant energy (Anderson and Kolder), 242

Crystalline lens, studies: turnover of glycine and glutamic acid in glutathione and ophthalmic acid in rabbit (Reddy, Klethi, and Kinsey), 594

Crystallins, alpha, beta, and gamma, in ocular lens of rabbits: preparation and partial characterization (Mason and Hines), 601

Cytoplasmic granules of corneal stroma cell (Kitano), 277

D

Densitometry of pigments in rods and cones of normal and color defective subjects (Rushton), 233

Detachment of retina, effect on induced and resting ocular potentials in rabbit (Foulds and Ikeda), 93

Diabetes caused by alloxan and pancreatectomy, comparison of amino acid transport in ocular structures of rabbits with (Reddy, Kinsey, and Nathorst-Windahl), 166

Diabetic rabbit lens, sorbitol pathway metabolites in (Kuck), 65

Diurnal rhythm, ^{3}H-thymidine incorporation, and cell division, effect of age on, in lens epithelium of rats (von Sallmann and Grimes), 560

DNA synthesis in corneal epithelial cells of dogfish, antagonists of (Zigman, Tuttle, and Lerman), 636

Dog, oculorespiratory cardiac reflex (Joffe and Gay), 550

Dogfish, corneal epithelial cells of, antagonists of DNA synthesis in (Zigman, Tuttle, and Lerman), 636

E

Electrical activity of retina and rhodopsin in congenital night blindness (Carr et al.), 497

fields, midbrain, produced by stimulation of muscle branches of oculomotor nerve (Shimo-oku and Jampel), 256

potential between cornea and retina, oscillations of, and infrared radiant energy (Anderson and Kolder), 242

Electroretinographic abnormalities and advanced multiple sclerosis (Gills), 555

Embolization, acute, pathophysiology of retinal vascular bed following (Henkind and Dollery), 204
Endothelial cell lined lymphatics in vascularized rabbit cornea (Collin), 337
permeability to water, in vivo determination (Stanley, Mishima, and Klyce), 371
Endothelium, corneal, in vitro, characterization by ultrastructure and histochemistry (Lowry), 355
forming inner wall of Schlemm's canal, effect of pilocarpine on, in monkey (Holmberg and Bárány), 53
Energy metabolism in lens during development of galactose cataract in rats (Sippel), 576
Enzyme activities, development in corneal connective tissue cells during lag phase of wound repair (Weimar and Haraguchi), 14
Epinephrine and intraocular pressure (Galin, Baras, and Glenn), 120
ocular hypersensitivity to (Aronson and Yamamoto), 75
topically applied to eye, systemic effects (Ballin, Becker, and Goldman), 125
Epithelium, ciliary, of albino rabbits, nucleoside phosphatase activity in (Shiose and Sears), 152
lens, of rats, effect of age on cell division, ^{3}H-thymidine incorporation, and diurnal variation in (von Sallmann and Grimes), 560
nonpigmented, ciliary, nucleoside phosphatase activity in (Shiose and Sears), 152
Extraocular and interosseus muscles in monkey, comparison of fine structure (Cheng and Breinin), 535
Eye and related structures, adrenergic nerves to, in man and cynomologus monkey (Ehinger), 42
Eye-primer, eye illnesses in general practice (Brückner) (B. rev.), 228

F

Fatty acid and sterol synthesis in intact calf cornea (Andrews), 367
Fiber optic bundle, retinal receptors as, resolution in excised retinal tissue (Enoch and Glismann), 208
Fibers, afferent, from oculomotor nerves, trigeminal path way for (Joffe, Gay, and Antrim), 222
Formalin-resistant oxidase-like reaction in corneal connective tissue cells during lag phase of wound repair (Weimar and Haraguchi), 14

G

Galactose cataract development in rats, changes in water, protein, and glutathione contents of lens in course of (Sippel), 568
energy metabolism in lens during (Sippel), 576
Ganglionectomy, cervical, changes in outflow facility and norepinephrine content in iris and ciliary processes of albino rabbit after (Sears et al.), 312
Geometric optics, textbook of (Southall) (B. rev.), 421
Glaucoma, adrenergic drugs in (Sears), 115
cholinergic and anticholinesterase agents in, comparison of action (Drance), 130
cholinesterase agents, long-acting use in (Klayman), 136
chronic open-angle, patients with and without, venous pressure opposing aqueous outflow in (Bettman, McEwen, and McBain), 624
influence of miotics on visual fields in (Forbes), 139
Glutamic acid and glycine, turnover in gluthatione and ophthalmic acid in rabbit (Reddy, Klethi, and Everett), 594
Glutathione and ophthalmic acid in rabbit, turnover of glycine and glutamic acid in (Reddy, Klethi, and Kinsey), 594
water, and protein contents of lens, changes in course of galactose cataract development in rats (Sippel), 568
Glycine and glutamic acid, turnover in glutathione and ophthalmic acid in rabbit (Reddy, Klethi, and Kinsey), 594

H

Heritable disorders of connective tissue (McKusick) (B. rev.), 421
^{3}H-thymidine incorporation, diurnal rhythm, and cell division, effect of age on, in lens epithelium of rats (von Sallmann and Grimes), 560
Hypersensitivity, ocular, to epinephrine (Aronson and Yamamoto), 75

I

Immunofluorescence studies on induction and differentiation of chicken eye lens (Ikeda and Zwaan), 402
Infrared radiant energy and oscillations of corneoretinal potential in man (Anderson and Kolder), 242
Interosseus and extraocular muscles in monkey, comparison of fine structure (Cheng and Breinin), 535
Intraocular pressure, influence on ophthalmic pulse (Lawrence and Schlegel), 515
volume, outflow facility and, cervical sympathetic stimulation in monkeys and effects on (Casey), 33

Iodide and iodopyracet accumulation by rabbit ciliary body–iris preparations, influence of pilocarpine on (Wålinder), 378

Iodopyracet and iodide accumulation by rabbit ciliary body–iris preparations, influence of pilocarpine on (Wålinder), 378

Iris and ciliary body preparations, iodopyracet and iodide accumulation by, influence of pilocarpine on (Wålinder), 378

processes of albino rabbits, changes in outflow facility and norepinephrine content after cervical ganglionectomy (Sears et al.), 312

K

Keractectomy and keratoplasty, atlas of (Castroviejo) (B. rev.), 642

L

Landolt's club in amphibian retina: Golgi and electron microscope study (Hendrickson), 484

Laser effects on monkey eye (Jones and McCartney), 474

Lens, aqueous and, trivalent chromium in (Farkas and Pluščec), 398

capsule, rat, growth and development, autoradiographic studies (Young and Ocumpaugh), 583

changes in water, protein, and glutathione contents in course of galactose cataract development in rats (Sippel), 568

chicken eye, induction and differentiation, immunofluorescence studies on (Ikeda and Zwaan), 402

crystalline, studies: turnover of glycine and glutamic acid in glutathione and ophthalmic acid in rabbit (Reddy, Klethi, and Kinsey), 594

Lens—Cont'd

diabetic rabbit, sorbitol pathway metabolites in (Kuck), 65

energy metabolism in, during development of galactose cataract in rats (Sippel), 576

epithelium of rats, effect of age on cell division, ^{3}H-thymidine incorporation, and diurnal rhythm in (von Sallmann and Grimes), 560

ocular, of rabbits, alpha, beta, and gamma crystallins in: preparation and partial characterization (Mason and Hines), 601

protein, soluble, conversion to albuminoid (Fulhorst and Young), 298

synthesis in, regional differences in, in rat (Young and Fulhorst), 288

Lenses, mirrors, prisms and, textbook of geometric optics (Southall) (B. rev.), 421

of rabbits made diabetic by alloxan and pancreatectomy, comparison of amino acid transport in (Reddy, Kinsey, and Nathorst-Windahl), 166

Light, retinal damage by, in rats (Noell et al.), 450

Lymphatics, corneal, in alloxan vascularized rabbit eyes (Collin), 1

endothelial cell lined, in vascularized rabbit cornea (Collin), 337

M

Metabolism, energy, in lens during development of galactose cataract in rats (Sippel), 576

Metabolites, sorbitol pathway, in diabetic rabbit lens (Kuck), 65

Microvascular system, principles of (Bloch), 250

Midbrain electrical fields produced by stimulation of muscle branches of oculomotor nerve (Shimoku and Jampel), 256

Mirrors, prisms, and lenses, textbook of geometric optics (Southall) (B. rev.), 421

Miotic drugs, pupil response to, quantitative study (Ogle, Whisnant, and Hazelrig), 176

influence on visual fields in glaucoma (Forbes), 139

Monkey, extraocular and interosseus muscles, comparison of fine structure (Cheng and Breinin), 535

Monkeys, Ethiopian green, pressure in canal of Schlemm and its relation to site of resistance to outflow of aqueous humor in eyes of (Sears), 610

Multiple sclerosis, advanced, and electroretinographic abnormalities (Gills), 555

Mucopolysaccharides in beef retina and small cerebral vessels (Freeman and Wortman), 88

sulfated, distribution and synthesis in retina of rat (Ocumpaugh and Young), 196

Muscles, extraocular and interosseus, monkey, comparison of fine structure (Cheng and Breinin), 535

N

Nerves, oculomotor, trigeminal pathway for afferent fibers from (Joffe, Gay, and Antrim), 222

Night blindness, congenital, rhodopsin and electrical activity of retina in (Carr et al.), 497

visual functions in (Carr et al.), 508

Norepinephrine content in iris and ciliary processes of albino rabbits, changes after cervical ganglionectomy (Sears et al.), 312

Nucleoside phosphatase activity in ciliary epithelium of albino rabbits, fine structural localization (Shiose and Sears), 152

O

Ocular adnexa, surgery of, Transactions of the New Orleans Academy of Ophthalmology (B. rev.), 642

hypersensitivity to epinephrine (Aronson and Yamamoto), 75

lens of rabbits, alpha, beta, and gamma crystallins in: preparation and partial characterization (Mason and Hines), 601

lesions induced in C57 mice by suckling mouse cataract agent (SMCA) (Olmsted et al.), 413

potentials, induced and resting, effect of detachment of retina on, in rabbit (Foulds and Ikeda), 93

Oculomotor nerve, stimulation of muscle branches of, midbrain electrical fields produced by (Shimo-oku and Jampel), 256

nerves, trigeminal pathway for afferent fibers from (Joffe, Gay, and Antrim), 222

Oculorespiratory cardiac reflex in dog (Joffe and Gay), 550

Ophthalmic acid and glutathione in rabbit, turnover of glycine and glutamic acid in (Reddy, Klethi, and Everett), 594

Optic nerves and chiasm, indirect trauma to, pathological-clinical correlations (Walsh), 433

Optics, geometric, textbook of (Southall) (B. rev.), 421

Orbital tissues, relationship of sulfatase activity to radiosulfate uptake in (Haddad), 81

Ouabain and chlorothiazide effect on aqueous humor turnover rates in cat (Macri, Dixon, and Rall), 386

Outflow facility and intraocular volume, cervical sympathetic stimulation in monkeys and effects on (Casey), 33

Outflow facility—Cont'd

norepinephrine content in iris and ciliary processes of albino rabbits, changes after cervical ganglionectomy (Sears et al.), 312

Oxidase-like, formalin-resistant reaction in corneal connective tissue cells during lag phase of wound repair (Weimar and Haraguchi), 14

P

Pancreatectomy, alloxan and, comparison of amino acid transport in ocular structures of rabbits made diabetic by (Reddy, Kinsey, and Nathorst-Windahl), 166

Permeability to water, endothelial, in vivo determination (Stanley), 371

Phosphatase, nucleoside, activity in ciliary epithelium of albino rabbits, fine structural localization (Shiose and Sears), 152

Pigments of rods and cones, densitometry of (Rushton), 233

Pilocarpine, effect on endothelium forming inner wall of Schlemm's canal in monkey (Holmberg and Bárány), 53

effects on dynamics of aqueous humor in cynomolgus monkeys (Bill and Wålinder), 170

influence on iodopyracet and iodide accumulation by rabbit ciliary body–iris preparations (Wålinder), 378

Pleoptik und Orthoptik (Aust) (B. rev.), 642

Potentials, ocular, induced and resting, effects of detachment of retina on, in rabbit (Foulds and Ikeda), 93

Presbyopic monkeys, effect of topical carbachol on pupil and refraction in (Törnqvist), 186

Pressure, intraocular, aqueous-venous shunt and, report of animal studies (Lee and Schepens), 59

l-epinephrine and (Galin, Baras, and Glenn), 120

Prisms, mirrors and lenses, textbook of geometric optics (Southall) (B. rev.), 421

Proctor Medal of Association for Research in Ophthalmology: remarks made on acceptance (Walsh), 428

Protein, lens, soluble, conversion to albuminoid (Fulhorst and Young), 298

synthesis within rat lens, regional differences in (Young and Fulhorst), 288

water, and glutathione contents of lens, changes in course of galactose cataract development in rats (Sippel), 568

Pulse, ophthalmic, influence of intraocular pressure on (Lawrence and Schlegel), 515

Pupil and refraction, effect of topical carbachol on, in young and presbyopic monkeys (Törnqvist), 186

response to miotic drugs, quantitative study (Ogle, Whisnant, and Hazelrig), 176

R

Rabbit, glutathione and ophthalmic acid in, turnover of glycine and glutamic acid in (Reddy, Klethi, and Everett), 594

ocular lens, alpha, beta, and gamma crystallins in: preparation and partial characterization (Mason and Hines), 601

Radiosulfate uptake, relationship of sulfatase activity to, in guinea pig orbital tissues (Haddad), 81

Rat, galactose cataract development in, changes in water, protein, and glutathione contents of lens in course of (Sippel), 568
energy metabolism in lens during (Sippel), 576
epithelium of, effect of age on cell division, ^{3}H-thymidine incorporation, and diurnal variation in (von Sallmann and Grimes), 560
lens capsule, growth and development, autoradiographic studies (Young and Ocumpaugh), 583
Rhodopsin and electrical activity of retina in congenital night blindness (Carr et al.), 497
Receptors, retinal, as fiber optic bundle, resolution in excised retinal tissue (Enoch and Glismann), 208
Reflex, oculorespiratory cardiac, in dog (Joffe and Gay), 550
Refraction, pupil and, effect of topical carbachol on, in young and presbyopic monkeys (Törnqvist), 186
Retina, amphibian, Landolt's club in: Golgi and electron microscope study (Hendrickson), 484
detachment, effects on induced and resting ocular potentials in rabbit (Foulds and Ikeda), 93
electrical activity of, and rhodopsin in congenital night blindness (Carr et al.), 497
rat, sulfated mucopolysaccharides in, distribution and synthesis (Ocumpaugh and Young), 196
and small cerebral blood vessels, beef, mucopolysaccharides in (Freeman and Wortman), 88
Retinal damage by light in rats (Noell et al.), 450
Retinal—Cont'd
detachment, vitreoretinal pathology and surgery in (Cibis) (B. rev.), 228
receptors as fiber optic bundle, resolution in excised retinal tissue (Enoch and Glismann), 208
tissue, excised, physical and optical changes in (Enoch and Glismann), 208
vascular bed, pathophysiology following acute embolization (Henkind and Dollery), 204
Rods and cones, densitometry of pigments in (Rushton), 233

S

Schlemm's canal, endothelium forming inner wall, effect of pilocarpine on, in monkey (Holmberg and Bárány), 53
pressure in, and its relation to site of resistance outflow of aqueous humor in eyes of Ethiopian green monkeys (Sears), 610
Sclerosis, multiple, advanced, and electroretinographic abnormalities (Gills), 550
Selenium content of tissues of human eye (Christian and Michaelis), 248
Shunt, aqueous-venous, effect on rabbit eyes (Lee and Schepens), 304
and intraocular pressure, report of animal studies (Lee and Schepens), 59
Sorbitol pathway metabolites in diabetic rabbit lens (Kuck), 65
Sterol and fatty acid synthesis in intact calf cornea (Andrews), 367
Structure, fine, of extraocular and interosseus muscles in monkey, comparison (Cheng and Breinin), 535
Suckling mouse cataract agent (SMCA), ocular lesions induced in C57 mice by (Olmsted et al.), 413
Sulfatase activity, relation to radiosulfate uptake in guinea pig orbital tissues (Haddad), 81
Sulfated mucopolysaccharides, distribution and synthesis in retina of rat (Ocumpaugh and Young), 196
Surgery of the ocular adnexa, Transactions of the New Orleans Academy of Ophthalmology (B. rev.), 642
Sympathetic stimulation, cervical, in monkeys, and effects on outflow facility and intraocular volume (Casey), 33
Symposium on glaucoma, joint meeting with National Society for Prevention of Blindness, 115
surgery of the ocular adnexa, Transactions of the New Orleans Academy of Ophthalmology (B. rev.), 642

T

Tear volume and flow, determination (Mishima et al.), 264
Thiourea, turnover in aqueous humor of rabbit eye (Ballin et al.), 391
Transport, amino acid, in ocular structures of rabbits made diabetic by alloxan and pancreatectomy, comparison (Reddy, Kinsey, and Nathorst-Windahl), 166
localization of adenosine triphosphatase activity in rabbit cornea in relation to (Kaye and Tice), 22
Trigeminal pathway for afferent fibers from oculomotor nerves (Joffe, Gay, and Antrim), 222
TSH, sulfating effect on guinea pig orbital tissues (Haddad), 81

Turnover rates of aqueous humor, effect of ouabain and chlorothiazide on (Macri, Dixon, and Rall), 386
of thiourea in aqueous humor of rabbit eye (Ballin et al.), 391

V

Vascular bed, retinal, pathophysiology following acute embolization (Henkind and Dollery), 204
Vascularization, alloxan, of rabbit eyes, corneal lymphatics with (Collin), 1
Vascularized cornea, endothelial cell lined lymphatics in (Collin), 337
Venous pressure opposing aqueous outflow in patients with and without chronic open-angle glaucoma (Bettman, McEwen, and McBain), 624
Visual fields, influence of miotics on, in glaucoma (Forbes), 139
functions in congenital night blindness (Carr et al.), 508
Vitreoretinal pathology and surgery in retinal detachment (Cibis) (B. rev.), 228

W

Water, protein, and glutathione contents of lens, changes in course of galactose cataract development in rats (Sippel), 568
Wound repair, development of enzyme activities in corneal connective tissue cells during lag phase of (Weimar and Haraguchi), 14
